

PROFORMA — Master Consolidated Billing Overview

LIONGATE SARL — Consolidated Infrastructure & Tooling Cost Plan

Document: PROFORMA-00 (Master)

Currency: EUR (€)

Version: 1.0

Source documents: PROFORMA-01 through PROFORMA-06

Purpose of this document:

This is the **executive cost-planning reference** for LIONGATE SARL.

It consolidates every individual proforma (Odoo, standard web apps, high-traffic projects, internal tools, DevOps, project management) into a single view, then proposes three ready-to-budget company scenarios for **Year 1**, **Year 2**, and **Year 3** of operation.

Use this as the input to financial planning, client quoting, and headcount decisions.

1. Source Proformas — Index

#	Document	Scope
00	proforma-00-master-consolidated-billing-overview.md	This document — consolidated view
01	proforma-01-odoo-instance-billing.md	Self-hosted Odoo ERP
02	proforma-02-standard-web-application-billing.md	Standard web app (NestJS/Next.js + Postgres)
03	proforma-03-high-traffic-client-project-billing.md	High-traffic public SaaS / e-commerce

#	Document	Scope
04	proforma-04-internal-tools-billing.md	Internal-staff-only tools
05	proforma-05-infrastructure-devops-shared-tools-billing.md	Company-wide DevOps & engineering tooling
06	proforma-06-project-management-tools-billing.md	PM tooling (Case A enterprise / Case B Odoo+GitHub)

2. Tier Cross-reference

All proformas use compatible tier names. The table below allows a single project to be sized at a glance.

Proforma	T1 / Min	T2 / Recommended	T3 / Full	T4 / HA / Enterprise
01 Odoo	€33.75/mo	€76.00/mo	€150.00/mo	~€350/mo (HA)
02 Web	€20.03/mo	€70.08/mo	€103.98/mo	€219.11/mo
03 HighT	€226.86/mo	€615.83/mo	€1,378.05/mo	€4,638.68/mo
04 Intl	€18.84/mo	€63.80/mo	€146.89/mo	—
05 DevOps	€76.55/mo	€604.54/mo	€3,131.52/mo	—
06A PM	€230.56/mo	€983.26/mo	€3,081.70/mo	—
06B PM	€109.11/mo	€666.56/mo	€2,547.50/mo	—

💡 Proforma-01..04 are **per-project**. Proforma-05 and Proforma-06 are **company-wide** (paid once, regardless of project count).

3. Cost Anatomy of a Single Project

For any new project, the monthly cost equation is:

Project cost = Project hosting (PROFORMA-01..04, by type+tier)

+ Marginal DevOps cost (PROFORMA-05 ÷ active projects)

+ Marginal PM cost (PROFORMA-06 ÷ active projects)

Worked example — One client web app, Tier 2

Project hosting (PROFORMA-02 T2):	€70.08
DevOps share (PROFORMA-05 T-B €604.54 / 4 projects):	€151.14
PM share (PROFORMA-06 Case B T2 €666.56 / 4):	€166.64

True fully-loaded monthly cost:	€387.86
True fully-loaded annual cost:	€4,654.32

 **Quoting rule of thumb:** when pricing a client, multiply true monthly infra cost by **2.5x to 4x** to cover engineering labour, overhead, and margin.

4. Year-by-Year Company Budget Scenarios

Three forward-looking scenarios assuming LIONGATE's current trajectory (startup phase, 2026 → 2028).

4.1 Scenario — Year 1 (Bootstrapping, 2–5 engineers)

Assumptions:

- 3 engineers + 1 founder
- 1 self-hosted Odoo (internal use)
- 2 client projects (Tier 1 web apps)
- 1 lightweight internal tool

Component	Reference	Monthly (€)	Annual (€)
Odoo (internal) — T1	PROFORMA-01 T1	33.75	405.00

Component	Reference	Monthly (€)	Annual (€)
Client project A — Web T1	PROFORMA-02 T1	20.03	240.36
Client project B — Web T1	PROFORMA-02 T1	20.03	240.36
Internal tool — T1	PROFORMA-04 T1	18.84	226.08
DevOps shared tooling — Tier A	PROFORMA-05 Tier A	76.55	918.60
Project management — Case B T1	PROFORMA-06 B-T1	109.11	1,309.32
YEAR 1 TOTAL (before contingency)		€278.31	€3,339.72
+15% contingency		€320.06	€3,840.68

4.2 Scenario — Year 2 (Growth, 6–12 engineers)

Assumptions:

- 8 engineers + 2 founders + 1 PM
- 1 Odoo (internal — upgraded to T2)
- 4 client web apps (mix: 2× T2, 1× T3, 1× T1)
- 1 high-traffic launch (T1)
- 2 internal tools (T2)

Component	Reference	Monthly (€)	Annual (€)
Odoo (internal) — T2	PROFORMA-01 T2	76.00	912.00
Client web app A — T2	PROFORMA-02 T2	70.08	840.96
Client web app B — T2	PROFORMA-02 T2	70.08	840.96
Client web app C — T3	PROFORMA-02 T3	103.98	1,247.76
Client web app D — T1	PROFORMA-02 T1	20.03	240.36
High-traffic launch — T1	PROFORMA-03 T1	226.86	2,722.32
Internal tools (shared host, T2)	PROFORMA-04 T2	63.80	765.60
DevOps shared tooling — Tier B	PROFORMA-05 Tier B	604.54	7,254.48
Project management — Case B T2	PROFORMA-06 B-T2	666.56	7,998.72

Component	Reference	Monthly (€)	Annual (€)
YEAR 2 TOTAL (before contingency)		€1,901.93	€22,823.16
+15% contingency		€2,187.22	€26,246.63

4.3 Scenario — Year 3 (Established, 15–25 engineers)

Assumptions:

- 18 engineers + 2 founders + 3 PMs + 2 ops
- 1 Odoo (internal — T3)
- 6 client web apps (mix: 1× T1, 3× T2, 2× T3)
- 2 high-traffic projects (1× T1, 1× T2)
- 3 internal tools (consolidated on T3 stack)

Component	Reference	Monthly (€)	Annual (€)
Odoo (internal) — T3	PROFORMA-01 T3	150.00	1,800.00
Client web app A — T1	PROFORMA-02 T1	20.03	240.36
Client web apps B/C/D — T2 (×3)	PROFORMA-02 T2	210.24	2,522.88
Client web apps E/F — T3 (×2)	PROFORMA-02 T3	207.96	2,495.52
High-traffic project X — T1	PROFORMA-03 T1	226.86	2,722.32
High-traffic project Y — T2	PROFORMA-03 T2	615.83	7,389.96
Internal tools — T3	PROFORMA-04 T3	146.89	1,762.68
DevOps shared tooling — Tier C	PROFORMA-05 Tier C	3,131.52	37,590.24
Project management — Case B T3	PROFORMA-06 B-T3	2,547.50	30,570.00
YEAR 3 TOTAL (before contingency)		€7,256.83	€87,093.96
+15% contingency		€8,345.35	€100,158.05

5. Consolidated Year-Over-Year Forecast

Year	Headcount	Active projects	Monthly (€)	Annual (€)	Avg cost per engineer/yr
Y1	~4	4	€320.06	€3,840.68	€960.17
Y2	~11	8	€2,187.22	€26,246.63	€2,386.06
Y3	~25	12	€8,345.35	€100,158.05	€4,006.32

Cost-share breakdown (Y2 example, % of monthly)

Category	Monthly (€)	Share
Per-project hosting (PROFORMA-01..04)	€630.83	33.2%
DevOps shared tooling	€604.54	31.8%
Project management tooling	€666.56	35.0%

 **Key insight:** From Y2 onward, **company-wide tooling (DevOps + PM)** typically exceeds per-project hosting cost. Optimising headcount and seat-based SaaS becomes more impactful than optimising server tiers.

6. Recommended Defaults for LIONGATE SARL

Based on the analysis across all proformas, the **recommended defaults** are:

Decision	Recommendation
Hosting provider	Hetzner Cloud (primary) + Hetzner Robot (Tier 4 only)
Domain registrar	United Domains (already chosen)
DNS / edge	Cloudflare Free → Pro at first paying client
Odoo edition	Community (Enterprise only if a client mandates it)
Project management model	Case B — Odoo + GitHub Projects (default)

Decision	Recommendation
DevOps tier transitions	Tier A → Tier B at the 3rd active client project
Internal tools strategy	One shared internal-apps server (PROFORMA-04 T2)
Default client project tier	PROFORMA-02 Tier 2 (recommended), upsell to T3 if SLAs
High-traffic default	PROFORMA-03 Tier 1 at launch; pre-scoped path to T2/T3
Quoting markup	2.5–4× true infra cost for client billing
Annual contingency buffer	15% for infra, 20% for SaaS

7. Client Quoting Quick-Reference

Use this table to price the **infrastructure pass-through** to a client.

Client project type	Suggested tier	Pass-through / mo	Pass-through / yr
MVP / prototype / internal pilot	PROFORMA-02 T1	€20–€30	€240–€370
Standard business web app	PROFORMA-02 T2	€70–€90	€840–€1,100
Active SaaS product	PROFORMA-02 T3	€100–€135	€1,250–€1,575
Public launch (high-traffic)	PROFORMA-03 T1	€225–€285	€2,720–€3,420
Growing SaaS with read replica	PROFORMA-03 T2	€615–€745	€7,390–€8,936
HA / mission-critical SaaS	PROFORMA-03 T3	€1,378–€1,640	€16,540– €19,660
Multi-region / SLA-backed	PROFORMA-03 T4	€4,640–€5,420	€55,665– €65,030
Odoo deployment for client	PROFORMA-01 T2 or T3	€76–€150	€912–€1,800

Always quote infra **separately** from engineering labour. Engineering labour is **not** in any proforma.

8. Master Cost Optimisation Levers

Ranked from highest impact to lowest:

#	Lever	Estimated saving
1	Use Case B (Odoo + GitHub Projects) instead of Case A	€1,400–€6,400/yr depending on size
2	Self-host Doppler → Vault	€180–€900/mo
3	Self-host Notion → Outline	€115–€420/mo
4	Use Cloudflare Access Free instead of Tailscale Business	€450/mo at 25 users
5	Stop staging servers off-hours	50–60% of staging cost
6	Co-locate internal tools on one shared internal-apps server	€40–€80/mo per tool avoided
7	Prefer Hetzner Object Storage over Hetzner Storage Box for cold backups	€5–€20/mo per TB
8	Use Let's Encrypt rather than commercial SSL	€50–€500/yr per cert
9	Consolidate domains on United Domains rather than per-project registrars	€5–€10/yr per domain
10	Use community Odoo + self-built modules instead of Odoo Enterprise	€31.10/user/mo

9. Master Budget Planning Cheat Sheet

LIONGATE SARL – MASTER BUDGET CHEAT SHEET
=====

YEAR 1 (Bootstrapping, ~4 people, 4 projects)

Conservative annual budget: €3,841 (€320/mo)
Per-engineer/yr: ~€960

YEAR 2 (Growth, ~11 people, 8 projects)

Conservative annual budget: €26,247 (€2,187/mo)
Per-engineer/yr: ~€2,386

YEAR 3 (Established, ~25 people, 12 projects)

Conservative annual budget: €100,158 (€8,345/mo)
Per-engineer/yr: ~€4,006

3-YEAR TOTAL INFRA + TOOLING: ~€130,246

10. Maintenance & Review

Activity	Cadence	Owner
Review Hetzner pricing changes	Quarterly	DevOps lead
Review SaaS seat utilisation	Monthly	Operations / Finance
Revalidate per-project tiers	At each project kickoff	Tech lead
Re-issue this master proforma	Every 6 months	DevOps lead
Audit hidden costs vs forecast	Quarterly	Finance
Annual contingency true-up	Annually (calendar Q1)	Finance

11. Assumptions, Caveats, Open Questions

Assumptions

- All prices are **Hetzner public list rates** (EUR, VAT excluded) at time of writing.
- SaaS prices are **monthly-billed list prices** unless noted. Annual prepay typically saves 15–20%.
- A working day = 8 h. Engineering labour cost is **out of scope**.
- LIONGATE remains the operator (no managed/white-glove provider involved).
- All domains routed through United Domains; Cloudflare used only for DNS/CDN.

Caveats

- Hetzner pricing has changed multiple times in 2024–2025. Re-verify before contracts.
- SaaS providers (Atlassian, Notion, Slack) frequently restructure tiers. Re-verify quarterly.
- Bandwidth costs assume traffic within Hetzner free egress allowances (20 TB/mo per server).
- Backup restoration time and DR RTO/RPO are **not** budgeted here — covered in deployment docs.

Open questions for leadership

1. Will LIONGATE adopt **Odoo Enterprise** at any tier? (Currently assumed Community.)
2. Is **24/7 on-call** within scope for any current client? (Adds €500–€2,500/mo per project.)
3. Will LIONGATE target **SOC 2 / ISO 27001** within 18 months? (Adds €5k–€25k/yr.)
4. Should we standardise on **Tailscale paid plan** or stay on Cloudflare Access Free?
5. What is the maximum **per-project infra ceiling** acceptable without finance sign-off?

Document: PROFORMA-00 (Master) | Context: Consolidated billing overview

Aggregates: PROFORMA-01 through PROFORMA-06

Review cadence: Every 6 months, or at any tier transition

Prepared by: LIONGATE SARL Engineering Team
